

Lieutenant Governor John Garamendi will offer students innovative avenues to search for employment at the University of California, San Diego this Wednesday at 10 a.m. New jobs in California are growing most rapidly in science, engineering, and technology. Eight of the 10 fastest growing occupations in the United States are related to these fields, and there is an expected increase of 2.2 million science and engineering related jobs by 2010. President Obama's stimulus package calls for tripling science and engineering fellowships. California is focused on the new generation of great scientific leaders. California's youth can be the researchers of tomorrow at the Lockheed Martins, General Atomics, ResMeds and Life Technologies of the world. March 2009 is California Science Education Month. The San Diego Science Festival runs February 28 to April 4.
